Engineering and Mining Journal

Index to Volume 134 - - - January to December, 1933

Explanatory Note

THE general index to this volume is preceded by a list of the editorials published in the volume, and is followed by an index of authors. In the general index editorials are denoted by the letter "e" and news items by the letter "n." Following is a list of the pages included in the numbers of the volume by date:

January	1 to 48
February	49 to 92
March	93 to 136
April	137 to 180
May	181 to 224
June	225 to 268
July	269 to 312
August	313 to 356
September	357 to 400
October	401 to 444
November	445 to 500
December	501 to 544

EDITORIALS

Air conditioning, comfort and output.. 94
Applications of magnetism finds new opportunity 137
Applying laws of chance to national financing 94
Are there flaws in the blue sky law?.. 501
Blue sky legislation at Washington.... 314
Bromine from sea water, and metal losses 403
Capital for development of gold mines. 358
Centrifugal force as an aid to concentration 181
Chemical reactions and metallurgical advance 183
Code problems of equipment makers.. 313
Committee reports on manganese..... 227
Copper roof and wall construction..... 95
Definite function of a technical magazine 181
Design for industry—national experiment 225
Dust problem and silicosis 403
E. & M. J. does not endorse promotion enterprises 358
Editorial crushing and screening plant near Cold Spring 1
Efficient low grade gold ore treatment.. 93
Elements of a national mineral policy.. 226
End of deflation lifts prices..... 271
Engineer's responsibility to pioneer and innovate 227
Engineers and the public need protection 138
Enhancing the status of the engineer.... 503
Finding new outlets for mine products.. 138
Gold mining expansion on the Witwatersrand 95
Gold situation continues much of a situation 401
Gold standard currencies and the gold miner 315
Human factors and the machine age.... 50
Ignorance may prompt commission of fraud 182
Industrial competition—free or restricted? 137
Industrial uses for precious metals.... 502
Industry and the individual each needs encouragement 182
Informal instruction at technical schools 183
Iron ore taxation in Minnesota..... 270
Is gold mining the forgotten industry?.. 270
Is standard drill steel old fashioned?.. 49
Metallurgical practice at a famous gold mine 139
Metallurgy's debt to Faraday 403
Mining claims and the new deal 183
Modernization and industrial recovery.. 313
Modernization for profit—one road to recovery 401
Moving toward recovery 269
Natural nitrate and low cost production.. 226
New metallurgical plant enters the industry 402
Newly mined gold may be exported 357
Non-ferrous metal codes submitted..... 357
Physical fitness in the tropics..... 315
Progress in lead metallurgy 271
Re-employment and the machine 357
Rock drill bits as cutting tools..... 402
Salute to Nobel at Climax 402
Scientific determination of mine openings. 314
Scientific discovery and economic fact.. 49
Shenandoah-Dives again makes the grade. 93
Silicosis assumes steadily increasing importance 502
Spur to codes and recovery 313
Story of McIntyre 445
Technologic advance passes in review.... 49
Technical expansion and the debt burden 51
That four million Penrose bequest.... 270
Whither goeth the gold mining industry? 501
Without benefit of modernization..... 503
